Literacy Bin Course Syllabus

Course Title: Teaching Phonological Awareness
Course Options: 45 CEUs / 1 graduate credit / 3 graduate credits
Class Type: Accelerated Fully Online

COURSE DESCRIPTION:

Teaching Phonological Awareness focuses on equipping educators with the essential knowledge and skills to effectively teach phonological awareness—a critical skill for reading and language development. Participants will explore the nature and significance of phonological awareness, examine the challenges students may face when learning it, and learn evidence-based instructional strategies for all students. The course covers phonological awareness assessments, creating a scope and sequence based upon typical child development, setting instructional goals, key components and teaching techniques for teaching phonological awareness, activities that promote phonological awareness, and intervention strategies for struggling students. Through a concise and comprehensive exploration of these topics, educators will develop expertise in fostering phonological awareness and addressing difficulties. By the course's end, participants will be well-prepared to deliver targeted instruction, ensuring students develop strong foundations for reading and language skills.

Course Prerequisites: None

LEARNING GOALS:

GLOBAL GOALS OF THE COURSE:

1. Discuss, evaluate, and apply research-based theories of teaching students phonological awareness.
2. Examine and apply research-based theories of how the human brain learns to read through the lens of teaching phonological awareness.

INSTRUCTIONAL OBJECTIVES:

1. Discuss, evaluate, and apply theories of research-based instruction for teaching phonological awareness to students.

2. Apply understandings of how the human brain learns to read to design research-based instruction for teaching phonological awareness skills.
3. Execute techniques to design and implement research-based instruction for teaching phonological awareness skills to students.
4. Examine components of expected phonological awareness skill development.
5. Apply understanding of the components of expected phonological awareness skill development to design instruction.
6. Identify early warning signs of atypical phonological awareness development and/or acquisition.
7. Implement phonological awareness assessment techniques with students.
8. Apply results of students' phonological awareness assessments to designing instruction and interventions.

TEACHING/LEARNING ACTIVITIES:

Video clips, digital presentations, readings, graphic organizers, resource links, teaching tools, sample lessons, classroom discussion, lecture, etc. will all be implemented to demonstrate concepts.
